

# IT CONSULTING

## IT CONSULTING: **Your Full Service IT Solution**

TOURtech brings nearly two decades of experience in IT systems and network design, installation, maintenance and upgrades to your organization. We specialize in no-bloat networks, learned from years of deploying IT solutions in the fast-paced, demanding world of live entertainment. In the time it takes most managed service companies to design a system, we provide top-notch and fault tolerant implementations for temporary and permanent installations for any size organization.

### APPLICATIONS

#### Whatever your IT needs:

- Contract IT services to provide temporary assistance to in-house IT departments
- Full IT outsourcing so organizations can focus on their core-capabilities
- Contract technical support
- Network design services
- IT project management
- Equipment management
- Contract IT personnel

### FEATURES & BENEFITS

#### Bringing our experience to you:

- Wifi and LAN network design
- Remote network monitoring, analytics and troubleshooting
- Logistics management with pre-configured equipment for quick and easy installations
- Marketing support through Wifi data analytics
- Rapid deployment
- Bandwidth procurement
- Network design and mapping
- Hardware pricing and ordering
- ISP procurement and management
- Executive network protection, which secures and stabilizes your C-suite's connectivity, even when they are on the road

## IT CONSULTING CASE STUDY: Rapidly Deploying Flexible, Cost Effective IT Solutions

When the Tryon International Equestrian Center was chosen to host the 2018 World Equestrian Games, they needed to upgrade their networks to manage operations and deliver a world-class experience. The problem was: IT firms were quoting complicated and expensive solutions well beyond the scope of their post-event needs. Faced with unaffordable, inflated solutions, the Equestrian Center spent months trying to design their own solution but realized—too late—that their internal upgrades were not going to meet their needs.

**Enter TOURtech's IT Services.** After the Equestrian Center presented us with their daunting networking challenges, we devised a plan to augment their networks with a hybrid solution. We installed a core network and upgraded the organization's Wifi to a level that would provide massive network improvements but also suit their operations. As a result, we delivered the project under budget and in time, despite the compact timeline.
